Periosteum
Our Range:

**SMOOTH**
- Fine lines & wrinkles
- Tear troughs
- Russian lips
- Necklace lines
- Hyaluron pen
- Mesotherapy

**DEFINE**
- Perioral lines
- Natural lips
- Moderate wrinkles
- Frown lines

**ENRICH**
- Firm lips
- Lip volume
- Nasolabial folds
- Marionette lines
- Deep wrinkles
- Chin

**ULTRA**
- Nose
- Cheek
- Jawline
Ergonomic Design

Easy Operation

Ergonomically designed grip and push rod provides accurate and safe treatment with constant injection forces. Allows the user to perform various injection techniques according to treatment site.

- 30G TW needle for Smooth type
- 27G TW Needle for Define, Enrich & Ultra type
  (25G TW needle for Enrich and Ultra type: depends on user)
Hy-BRID Technology

Better Volume Effect and Retention

The Hy-BRID Technology makes the hyaluronic acid highly dense with uniform sized particles. This enables GENIUS to have optimal viscoelasticity and long-lasting volume.

Safety

Safe to Use on Patients

The manufacturing process is tightly controlled to bring the endotoxin and BDDE (chemical crosslinker) levels below the detection limit. The risk of adverse side effects (allergic reaction, oedema, etc.) are minimized.

*What is BDDE (1,4-butanediol diglycidyl ether, cross-linking agent)?

BDDE (1,4-butanediol ether) is a chemical cross-linking agent to make hyaluronic acid into gel form. The residual amount of BDDE is strictly regulated to less than 2 ppm. It was not detected in every GENIUS Filler.

*Hy-BRID Technology

Hyper Cross-linked
Based on non-animal HA
Residue-free
Improved Density and elasticity
